

TOILET ODOR BLOCKING SYSTEM, METHODE OF USE AND BIDET
Inventor: Zoltan Egeresi
Santa Cruz, CA

ABSTRACT OF THE DISCLOSURE (Amended)

The object of this invention is create an inexpensive highly effective toilet odor blocking system with low maintenance, low cost to block any or all odor from escaping from the toilet bowl by generating a continuous stream of bubbles to cover human waste using liquid soap, air pump and low volume water flow. Same system with higher water volume becomes a toilet bidet by using a special bubble / bidet adapter.

(In toilet bidet mode it uses limited water quantity diverted from the toilet tank valve or continuous water stream from a new art, the in line water adapter with bullock threading. This adapter is capable to be inserted between the toilet tank valve and toilet water hose providing a compressive fitted extra outlet for bidet, for odor blocking or for any other bathroom use.)
